EXPERIMENT 8

Create storyboards to represent the user flow for a mobile app (e.g., food delivery app).

NAME : SUBASH R

ROLL.NO : 2116240701538

Objective

To design a comprehensive **User Flow Storyboard** for a mobile e-commerce application. The goal is to map the logical transition from product discovery to successful transaction using low-fidelity wireframes to validate usability.

Design Methodology & Tools

- **Primary Tool:** Balsamiq Wireframes.
- **UI Philosophy:** "Content-First" design. By using placeholders (like the iconic $X.XX$ pricing and image boxes), we ensure the layout and navigation work before adding visual polish.
- **Navigation Strategy:** A persistent **Bottom Navigation Bar** (Home, Categories, Account) and a **Top Utility Bar** (Search, Cart) to ensure the user is never more than one tap away from the essentials.

The Storyboard: Step-by-Step User Flow

Step 1: The Launchpad (Homepage)

The entry point designed to provide immediate value through variety.

- **Key Components:** Category grid for quick filtering, a "Featured Items" section for curated discovery, and a bottom "Promotions" banner to drive sales.
- **User Action:** Browsing high-level categories or reacting to a special offer.

Step 2: Narrowing the Search (Search Results)

When a user has a specific intent, the app transitions to a focused list.

- **Key Components:** An active search query field and a vertical stack of product cards.
- **Functional Design:** Each card includes an "Add to Cart" button, allowing power users to bypass the details page for known items.

Step 3: Deep Dive (Product Details)

Providing the "Why" behind the purchase.

- **Key Components:** Large image placeholder, descriptive text (the classic *Lorem Ipsum*), and clear pricing.
- **User Action:** Evaluating the product specs before committing to the "Add to Cart" CTA.

Step 4: Review & Adjust (The Shopping Cart)

The final gate before the financial commitment.

- **Key Components:** Itemized list with **Quantity Steppers** (+/-) and a "Remove" option.
- **The Breakdown:** Clear visibility of Subtotal, Shipping, and the final Grand Total.

Step 5: Logistics (Shipping Information)

Transitioning from "What I want" to "Where I am."

- **Key Components:** Clean, labeled input fields for Name, Address, City, and Zip Code.
- **UX Focus:** Linear form design to reduce cognitive load and prevent input errors.

Step 6: Transaction (Payment Information)

The most sensitive part of the journey, requiring a high-trust layout.

- **Key Components:** Dedicated fields for Card Number, Expiry, CVV, and Cardholder Name.
- **CTA:** A prominent "Confirm Payment" button to signify the final step.

Step 7: The Finish Line (Order Confirmation)

Closing the loop and providing peace of mind.

- **Key Components:** A large visual success icon, a unique Order Number for tracking, and a "Continue Shopping" button to restart the cycle.

Component Breakdown Table

Screen	Primary Goal	Critical UI Elements
Home	Discovery	Category Grid, Promo Banner, Nav Bar
Search	Selection	Result List, Query Input, Add to Cart
Product Detail	Evaluation	Description Text, Large Image, Price
Cart	Verification	Quantity Steppers, Price Totals
Shipping	Location	Form Inputs (Name/Address)
Payment	Security	Credit Card Form, Secure CTA
Confirmation	Gratification	Success Icon, Order #, Loop-back Button
